

Linea Deco

EN Linea Deco is a decorative version of the popular acoustic luminaire Linea, designed for more ambient and representative spaces. Instead of linear lighting, it features three elegantly placed spherical glass light sources that create a soft, atmospheric glow and a refined visual accent. The lamp retains its iconic three-layer horizontal panel made from ecoPET – a recycled PET bottle material known for its excellent sound-absorbing properties and recyclability. This makes Linea Deco not only a visual highlight but also an acoustic enhancement that reduces echo and ambient noise. By combining decorative lighting with effective sound control, Linea Deco is ideal for lounge areas, hotel lobbies, reception zones, and modern meeting spaces where comfort meets design.

DE Linea Deco ist die dekorative Variante der bekannten akustischen Leuchte Linea, speziell entworfen für stimmungsvolle und repräsentative Räume. Anstelle des linearen Lichts verfügt sie über drei elegant platzierte kugelförmige Lichtquellen aus Glas, die ein sanftes, atmosphärisches Licht erzeugen und dem Raum eine besondere Note verleihen. Die Leuchte basiert auf dem markanten, dreischichtigen Horizontalpanel aus ecoPET – einem recycelten Material aus PET-Flaschen mit hervorragenden schallabsorbierenden Eigenschaften, das vollständig wiederverwertbar ist. Linea Deco verbessert somit nicht nur die Raumästhetik, sondern auch die Akustik durch die Reduzierung von Nachhall und Lärm. Durch die Kombination von dekorativem Licht und akustischer Funktionalität eignet sich Linea Deco ideal für Lounges, Hotellobbys, Empfangsbereiche und moderne Besprechungsräume, in denen Komfort und Design Hand in Hand gehen.

Step into the world of flexxica color palettes

Materials and colors mean everything. Ambience. Atmosphere. Identity. We want to influence and inspire the world of office interiors with our take on materials and colors. Bright and light. Dense and deep. Mix and match our color palettes for any creative design purpose.

Still undecided about which color to choose from our color palettes?

Scan the QR code and look closely at flexxica materials and colors!

We are constantly working on expanding our color palettes with new eco-friendly materials and suppliers that care about the environment as much as we do.

Our current color palettes are always online. Just scan the QR code above!

ARCHI felt ecoPET 12 mm

EN The high-quality PET sound panels are robust, durable, and have a slightly textile surface that can be washed. They have excellent sound-absorbing properties, are flame-resistant and recyclable.

DE Hochwertige PET-Akustikplatten sind massiv, strapazierfähig, mit einer leicht textilen Oberfläche, die gewaschen werden kann. Sie haben hervorragende Schalldämmeigenschaften, sind schwer entflammbar und können recycelt werden.

flexxica wool felt 5 mm

EN flexxica wool felt color palette is high-quality 5 mm thick felt. Wool felt has many technical uses, including, among others, in acoustics. The natural properties of wool make this felt not only look designer but also absorb noise and sound perfectly.

DE Die Farbpalette von flexxica Wollfilz ist hochwertiger 5 mm dicker Filz. Wollfilze haben viele technische Anwendungen, u. a. in der Akustik. Die natürlichen Eigenschaften der Wolle verleihen diesem Filz nicht nur ein Design-Look, sondern auch eine perfekte Dämpfung von Lärm und Geräuschen.

flexxica felt 5 mm

EN flexxica felt color palette is a wide range of flame-retardant design felts with a velour finish and high noise reduction properties. They are available in many colors, ideal for many decorative projects, including upholstery and interiors.

DE Die flexxica-Farbpalette für Filze ist eine große Auswahl an schwer entflammaren Designfilzen mit Velours-Finish und hohen Geräuschminderungseigenschaften. Sie sind in vielen Farben erhältlich, ideal für viele dekorative Projekte, einschließlich Polsterung und Innenausstattung.

Guidelines for cleaning and maintenance of materials used in flexxica luminaires.

To maintain the beautiful color and appearance of flexxica lighting fittings, we recommend gentle vacuuming with a soft tip, preferably weekly.

Stain removal – the golden rule

Remove the stain as soon as possible. Most stains can be removed with lukewarm water, possibly with the addition of a neutral detergent.

Merino wool felt

Wool is antistatic and does not attract dirt like other fabrics. Wool is also water-repellent, so the liquids slowly penetrate the fabric.
Cleaning: First, soak up as much liquid as possible with a white kitchen towel or cloth. If the stain has dried, remove as much as possible with a vacuum cleaner. Wipe carefully with a clean white cloth.

Upholstered material

Upholstery in flexxica luminaires is highly versatile and durable. The material is antistatic and fireproof, so stains are easily removed.
Cleaning: Do not wet the entire lampshade. Always use a clean white cotton cloth and only use small amounts of cleaning agent at a time.

EcoPET material

The ecoPET is made of 60% recycled PET bottles. It is straightforward to maintain, and stains can be removed easily and hassle-free.
Cleaning: Never rub hard to remove a stain. Always use a clean white cotton cloth with a bit of detergent.

Glass luminaires

Boya is made in a traditional blown-glass technology, therefore it requires special and delicate cleaning care.
Cleaning: Use a soft, lint-free microfiber or cotton cloth with distilled water (optimal) or mild glass cleaner or a solution of equal parts water and white vinegar. Wipe carefully with a clean white cloth.

WARNING!

Benzene, acetone, and similar solvent-based products may discolor the materials of the flexxica luminaires. Before use, apply a small amount of the product to an inconspicuous spot to ensure it doesn't cause any damage or discoloration.

The reproduction (even partial) of this catalog, for any reason and with any means, is prohibited without the prior written permission of flexxica.

Please note that the actual appearance of flexxica’s felt and fabric lighting fixtures may vary from the images shown in the catalog. This is because each type of felt and fabric possesses its own distinct characteristics. This is not a disadvantage of the luminaire but an advantage – each product is unique and unrepeatable.

Keep in mind that the colors of PET, felts, and fabric may differ slightly from what you see in the catalog. For the most accurate representation, we recommend referring to our sample book.

Due to the production process of both felt and PET, there may be slight variations in material between different production batches. Additionally, please take into consideration that PET boards have distinct left and right sides, along with a specific fiber arrangement. This is particularly important to consider when installing larger structures, such as wall-mounted panels.
