

Pira Wall

EN Acoustic Pira Wall is a wall-mounted light fixture that combines bold design with acoustic functionality. The soft glow emitted from the bottom creates a subtle halo effect on the wall, adding visual depth and atmosphere to the interior. The lamp is made from pressed felt derived from recycled PET bottles – an eco-friendly material that is also fully recyclable. Its layered structure enhances the visual design while effectively absorbing sound, improving the room’s acoustics. With its minimalist yet striking form, Acoustic Pira Wall fits perfectly into modern office, hospitality, or home interiors. It is more than just a wall lamp – it’s an architectural feature that brings both ambient lighting and acoustic comfort into the space.

DE Acoustic Pira Wall ist eine Wandleuchte, die markantes Design mit akustischer Funktionalität verbindet. Das sanfte Licht, das von der Unterseite ausgeht, erzeugt eine stimmungsvolle Lichtaura auf der Wand und verleiht dem Raum Tiefe und Atmosphäre. Der Korpus besteht aus gepresstem Filz aus recycelten PET-Flaschen – ein umweltfreundliches und vollständig recycelbares Material. Die mehrlagige Struktur verstärkt nicht nur den visuellen Effekt, sondern sorgt auch für eine effektive Schalldämpfung und verbessert somit die Raumakustik. Mit ihrer minimalistischen und zugleich prägnanten Form fügt sich Acoustic Pira Wall ideal in moderne Büro-, Hotel- oder Wohnräume ein. Diese Leuchte ist mehr als nur ein Wandlicht – sie ist ein architektonisches Element, das stimmungsvolles Licht und akustischen Komfort vereint.

Step into the world of flexxica color palettes

Materials and colors mean everything. Ambience. Atmosphere. Identity. We want to influence and inspire the world of office interiors with our take on materials and colors. Bright and light. Dense and deep. Mix and match our color palettes for any creative design purpose.

Still undecided about which color to choose from our color palettes?

Scan the QR code and look closely at flexxica materials and colors!

We are constantly working on expanding our color palettes with new eco-friendly materials and suppliers that care about the environment as much as we do.

Our current color palettes are always online. Just scan the QR code above!

ARCHI felt ecoPET 12 mm

EN The high-quality PET sound panels are robust, durable, and have a slightly textile surface that can be washed. They have excellent sound-absorbing properties, are flame-resistant and recyclable.

DE Hochwertige PET-Akustikplatten sind massiv, strapazierfähig, mit einer leicht textilen Oberfläche, die gewaschen werden kann. Sie haben hervorragende Schalldämmeigenschaften, sind schwer entflammbar und können recycelt werden.

flexxica wool felt 5 mm

EN flexxica wool felt color palette is high-quality 5 mm thick felt. Wool felt has many technical uses, including, among others, in acoustics. The natural properties of wool make this felt not only look designer but also absorb noise and sound perfectly.

DE Die Farbpalette von flexxica Wollfilz ist hochwertiger 5 mm dicker Filz. Wollfilze haben viele technische Anwendungen, u. a. in der Akustik. Die natürlichen Eigenschaften der Wolle verleihen diesem Filz nicht nur ein Design-Look, sondern auch eine perfekte Dämpfung von Lärm und Geräuschen.

flexxica felt 5 mm

EN flexxica felt color palette is a wide range of flame-retardant design felts with a velour finish and high noise reduction properties. They are available in many colors, ideal for many decorative projects, including upholstery and interiors.

DE Die flexxica-Farbpalette für Filze ist eine große Auswahl an schwer entflammaren Designfilzen mit Velours-Finish und hohen Geräuschminderungseigenschaften. Sie sind in vielen Farben erhältlich, ideal für viele dekorative Projekte, einschließlich Polsterung und Innenausstattung.

Guidelines for cleaning and maintenance of materials used in flexxica luminaires.

To maintain the beautiful color and appearance of flexxica lighting fittings, we recommend gentle vacuuming with a soft tip, preferably weekly.

Stain removal – the golden rule

Remove the stain as soon as possible. Most stains can be removed with lukewarm water, possibly with the addition of a neutral detergent.

Merino wool felt

Wool is antistatic and does not attract dirt like other fabrics. Wool is also water-repellent, so the liquids slowly penetrate the fabric.
Cleaning: First, soak up as much liquid as possible with a white kitchen towel or cloth. If the stain has dried, remove as much as possible with a vacuum cleaner. Wipe carefully with a clean white cloth.

Upholstered material

Upholstery in flexxica luminaires is highly versatile and durable. The material is antistatic and fireproof, so stains are easily removed.
Cleaning: Do not wet the entire lampshade. Always use a clean white cotton cloth and only use small amounts of cleaning agent at a time.

EcoPET material

The ecoPET is made of 60% recycled PET bottles. It is straightforward to maintain, and stains can be removed easily and hassle-free.
Cleaning: Never rub hard to remove a stain. Always use a clean white cotton cloth with a bit of detergent.

Glass luminaires

Boya is made in a traditional blown-glass technology, therefore it requires special and delicate cleaning care.
Cleaning: Use a soft, lint-free microfiber or cotton cloth with distilled water (optimal) or mild glass cleaner or a solution of equal parts water and white vinegar. Wipe carefully with a clean white cloth.

WARNING!

Benzene, acetone, and similar solvent-based products may discolor the materials of the flexxica luminaires. Before use, apply a small amount of the product to an inconspicuous spot to ensure it doesn't cause any damage or discoloration.

This catalog cancels and replaces all previous editions. flexxica has ensured that the information contained in this catalog is as accurate as possible; however, it declines all responsibility for any printing errors. flexxica reserves the right to make modifications and improvements of a technical or aesthetic nature to the products at any time without notice. The reproduction (even partial) of this catalog, for any reason and with any means, is prohibited without the prior written permission of flexxica.

Please note that the actual appearance of flexxica’s felt and fabric lighting fixtures may vary from the images shown in the catalog. This is because each type of felt and fabric possesses its own distinct characteristics. This is not a disadvantage of the luminaire but an advantage – each product is unique and unrepeatable.

Keep in mind that the colors of PET, felts, and fabric may differ slightly from what you see in the catalog. For the most accurate representation, we recommend referring to our sample book.

Due to the production process of both felt and PET, there may be slight variations in material between different production batches. Additionally, please take into consideration that PET boards have distinct left and right sides, along with a specific fiber arrangement. This is particularly important to consider when installing larger structures, such as wall-mounted panels.
